

Build the future of AI & data security with ownership, trust, and impact.

Theom is building a strategic framework for secure AI governance at the intersection of AI, data governance, and identity security. As enterprises shift from data operations to AI-driven environments, Theom solves the critical challenge of balancing rapid AI adoption with strong security and compliance. Through its unified Data Operations Center in Hyderabad, Theom is helping define how AI will be governed globally.

Who We Are & What We Do

Theom is an AI and Data Security & Access Governance platform focused on ensuring the right people have access to the right data at the right time. We are building next-generation cloud security solutions that enable enterprises to operate data and AI environments with trust, transparency, and control.

With the agility of a high-growth company and the strength of strong investor backing, Theom empowers you to innovate boldly, collaborate with world-class engineers, and create meaningful impact from day.

Mission

To empower organizations to securely govern and activate their data by leveraging AI-driven intelligence, ensuring trust, compliance, and protection in a rapidly evolving digital world.

Vision

To become the global leader in AI & data governance and security, enabling businesses everywhere to unlock the full value of their data safely and responsibly.

Our Core Values

Trust First

We build solutions and relationships rooted in trust, transparency, and integrity.

Ownership Mindset

Every team member has the autonomy and responsibility to drive impact.

Innovation with Purpose

We push boundaries to solve meaningful, real-world data security challenges.

Continuous Learning

We believe lifelong learning is essential to personal and organizational growth.

Impact over Hierarchy

Great ideas win, regardless of role or title.

Life at Theom India

Theom India is a core product engineering team building the platform we take to market. You'll work in a fast-paced, high-ownership environment with close collaboration across global teams - where your contributions are visible, trusted, and directly shape outcomes. At Theom, we promise you more than a job, we offer a platform to grow, innovate, and lead.

We promise to

- Trust you with meaningful responsibility
- Invest in your growth and learning
- Recognize and reward your contributions
- Give you the freedom to innovate
- Support your wellbeing and work-life balance

Why It Matters to Join Theom

Join Theom to build the future of AI & data security, where your ideas matter, your growth accelerates, and your impact is real.

Shape the Future

Be part of building cutting-edge AI and cloud security products that solve critical global challenges.

Be Part of Something Early

Join at a stage where your contributions truly define the company's future.

Accelerate Your Career

Work with world-class engineers in a high-growth environment designed for rapid learning and development.

Opportunity & Exposure

Gain exposure to cutting-edge AI and cloud technologies with equal participation in a collaborative, people-first culture.

Supported by Leading Investors

Theom is backed by leading VC firms, strategic investors, and seasoned security and data leaders - including CISOs, CTOs, CDOs, and technology operators who understand the complexity of securing cloud and hyperscale data. This backing reflects confidence in Theom's approach and the team's ability to execute.

Core Technologies We Use

We build a cloud-native, AI-era data security platform designed for real-time governance and protection - so controls follow the data wherever it lives. Our stack and deep platform integrations help us deliver agentless, continuous visibility and enforcement across modern data + cloud environments.

and more.

Benefits

Compensation & Wealth Creation

Competitive salary, equity, and retirement benefits.

Health & Wellness

Comprehensive health, dental, and vision coverage.

Work-Life Balance

Generous PTO, parental leave, and flexible work environment.

Culture & Flexibility

People first work model, offsites, and collaborative culture.

Explore More Opportunities with Us

If you're looking to build the next generation of AI and data security products - with trust, transparency, and lifelong learning at the center - Theom is the place to do it. Work with world-class engineers in a dynamic early-stage environment, with equity upside, minimal red tape, and real product impact.
